

Fire Extinguisher Refresher

UNIT STANDARD: N/A

Outline

The refresher course is designed for individuals who have previously completed fire extinguisher training and are looking to update their knowledge and skills. Participants will revisit various types of fire extinguishers and refresh their practical skills in using the correct equipment for fire suppression. A key focus will be on the latest developments and techniques in fire suppression, ensuring that participants are aware of the most current practices in the field.

Students will only be refreshed in the unit standards that they have already gained.

Objectives

On completion of the course, participants will be able to:

- + Identifying potential fire hazards and fuel sources in the workplace.
- + Developing strategies for responding to fire outbreaks, including the selection and use of extinguishers and safe suppression methods.
- + Recognizing the risks associated with handheld extinguishers and their potential consequences.
- + Practical training in extinguishing fires using portable extinguishers.

This course has been designed for:

-  This course is ideal for individuals who have had fire training and are wanting to refresh their knowledge and have access to fire extinguishers in their homes or workplaces, equipping them with the skills and knowledge to respond effectively to fire incidents.

 **Inhouse**

 **Public**

 **Face to face**

ASSESSMENT:

This course has one assessment which includes a practical activity.

DURATION: 2 hours
