Introduction to ISO 31000 Risk Management- Guidelines

+IMPAC

Outline

The purpose of risk management is the creation and protection of value. The ISO31000: 2018 Standard provides guidelines on the principles of risk management; the framework and processes to follow.

This introductory course gives an overview of the ISO 31000 Risk Management – Guidelines Standard content.

This course is ideal for:

- 👤 Implementers of health and safety management systems.
- 👤 Anybody involved in the risk management process.
- 👤 Internal and external auditors.
- 👤 Management in charge of health and safety management systems.

Objectives

On successful completion, students will be able to:

✚ Describe the importance of the risk management framework towards assisting the organisation in integrating risk management into significant activities and functions.

✚ Appreciate that the effectiveness of risk management depends on its integration into the governance of the organisation, including decision-making.

✚ Recognize that the principles of risk management are the foundation for managing risk and should be considered when establishing the organisation's risk management framework and processes.

✚ Demonstrate use of risk management processes involving the systematic application of policies, procedures and practices to the activities of communicating and consulting, establishing the context and assessing, treating, monitoring, reviewing, recording and reporting risk.
