

Mobile Elevated Work Platform (MEWP) Refresher

UNIT STANDARD: N/A

Outline

This comprehensive refresher course is designed to update learners on the various types of Mobile Elevated Working Platforms (MEWP), their operational mechanics and their specific applications.

Participants will gain a deep understanding of the potential hazards and the necessary control measures when using EWPs both stowed and at height.

The course covers the development of emergency procedures, and the completion of essential documentation such as Job Safety Analyses, Permits to Work, or Safe Operating Procedures.

This course has been designed for:

- Any professionals or workers required to safely and efficiently operate MEWPs in their role.
- This course is critical across various industries including construction, warehouse and logistics, arborists, landscapers, maintenance and facilities management, film production, utilities, emergency services and H+S professionals responsible for overseeing safe working practices on sites where MEWPs are in use.

Objectives

On successful completion, students will be able to:

- Ensure the MEWP is shut down, made safe, and secured, in accordance with organisational requirements.
- Demonstrate the types of EWP, suitability and safety aspects.
- Demonstrate industry requirements in relation to legislation and BPG's.
- Assess the worksite and prepare how to use EWPs.
- Carry out inspections on EWPs, report faults and damage, and know how to shut down EWPs.
- Demonstrate knowledge of a rescue plan to be activated in the event of the failure of a machine.
- Identify hazards and controls required for a working at heights task.
- Demonstrate knowledge of permit notification, implementation and regulator notification requirements.

ASSESSMENT:

This course has one assessment.

DURATION: 2 hours
CLASS SIZE: Maximum 4
