

# Be a Safe FORKLIFT DRIVER

## FASTEN YOUR SEATBELT

To keep you secure in the event of the forklift tipping over.

## SOUND YOUR HORN

And check over your shoulder before reversing.

## DON'T TRAVEL OR TURN WITH A RAISED LOAD

the forklift could tip over.

## FACE YOUR LOAD UPHILL WHEN TRAVELLING ON A SLOPE

If forklift is empty then reverse up the slope.

## GOING DOWNHILL? DRIVE IN REVERSE, SO LOAD FACES UPHILL

If forklift is empty drive facing forwards.

## BE CAREFUL OF REAR END SWING

Always turn slowly and leave extra space between forklift and other objects/people.

## DRIVE IN REVERSE IF THE LOAD BLOCKS YOUR VIEW
